

BMD[®]

OPTIMIZES PRODUCTIVITY

HEALTHIER

HEAVIER

FASTER

MORE

A 5-week **BMD[®]** sow program boosts maternal health, resulting in piglets that generate **more income**.

Multiple research studies have shown:

- Reduced preweaning mortality
- Reduced sow mortality
- Reduced clostridial shedding
- Heavier pigs at weaning
- Reduced piglet variability
- Marketability of low-birth-weight pigs
- Less sow weight loss during lactation

The BMD sow program yields a return-on-investment of 9:1.
